Digital Workplace | Apple Endpoint Management | Collaboration Platform Leadership

SUMMARY

Technology leader with 12+ years owning the platforms employees work on every day. Runs endpoint fleets at 5,000+ device scale across macOS, Windows, and ChromeOS alongside the Google Workspace and collaboration environment layered on top. Shifted an enterprise from a Windows-dominant estate to a near-even Mac split without loosening security compliance, replaced manual provisioning with zero-touch automation, and rebuilt ITSM so support decisions run on data rather than anecdote. Leads multiple distributed teams, owns operating budget, and partners directly with security, networking, and infrastructure counterparts.

SELECTED HIGHLIGHTS

- Grew macOS from 10% to 45% of a 5,000+ endpoint fleet (roughly 500 to 2,250 Macs) in under five years.
- Cut Mac provisioning from a 30-minute manual build to a fully automated zero-touch workflow under 15 minutes.
- Invited by Apple to present the university's Mac deployment program at three events.
- Led three teams across Client Technologies, Service Desk, and Executive Support.

PROFESSIONAL EXPERIENCE

Manager, IT Support Services | Field Services

Advocate Health / Atrium Health Wake Forest Baptist, High Point, NC | April 2026 - Present

- Lead a six-technician field services team supporting hospital campuses, ambulatory care sites, and specialty clinics across High Point and Greensboro, NC, holding service delivery to defined SLA targets.
- Own incident and request workflows in ServiceNow, using workload distribution and completion metrics to rebalance coverage and improve throughput across a distributed multi-site environment.
- Partner with networking, facilities, and clinical operations to scope and deliver technology projects including new site openings and service line expansions.
- Manage operating budget recommendations and hardware/software evaluation, aligning site-level needs with enterprise standards and spend objectives.
- Run 1:1s, performance reviews, and development planning for direct reports, and lead outage and change communication to clinical and administrative stakeholders.

Wake Forest University | Information Systems

Winston-Salem, NC | January 2013 - October 2025

Associate Director, Client Services | July 2022 - October 2025

- Grew macOS from 10% to 45% of a 5,000+ endpoint fleet in under five years, roughly 500 to 2,250 Macs, through user-choice programs, automation, and adoption enablement while holding enterprise security compliance.
- Cut Mac provisioning from a 30-minute manual, Terminal-driven build to a fully automated zero-touch workflow completing in under 15 minutes, eliminating hands-on command-line steps and standardizing every deployment.
- Owned enterprise endpoint management strategy across Jamf Pro, Intune/SCCM, and Chrome Browser Management, securing 5,000+ devices spanning macOS, Windows, and ChromeOS.
- Invited by Apple to present the university's Mac deployment program at three separate events, speaking to external audiences on large-scale endpoint strategy and adoption.
- Administered the Google Workspace environment supporting faculty, staff, and students, covering OU and group structure, Drive and shared drive governance, Chrome policy, and adoption enablement for campus partners.
- Led three teams across Client Technologies, Service Desk, and Executive Support, setting service standards, professional development paths, and process consistency across distributed staff.
- Modernized the Freshservice ITSM platform, standardizing intake and fulfillment across service desk and field support and improving first-contact resolution and ticket transparency.

- Built automated reporting with Google Apps Script and AppSheet, replacing manual data pulls with self-service exports for internal and external stakeholders.
- Led responsible evaluation and rollout of enterprise AI tooling including Google AI Pro and Microsoft Copilot, developing practical use cases and guiding institution-wide discussion on adoption and acceptable use.
- Presented environment changes, roadmap decisions, and technology updates to Faculty and Staff technology committees whose membership included Provost- and C-level leadership.

Assistant Director, Client Services | December 2020 - July 2022

- Introduced analytics dashboards for service level monitoring, moving performance conversations from anecdote to measured trends.
- Established device standardization and refresh processes aligned to lifecycle planning and security compliance requirements.
- Tightened collaboration with Enterprise Systems, Information Security, and Learning Systems, reducing duplicated effort and shortening incident resolution.

Senior Client Engagement Specialist | September 2017 - December 2020

- Served as consultative technology lead for high-impact departments including University Police and Student Health Services, ensuring operational continuity for 24/7 functions.
- Guided faculty and administrative staff through modernization initiatives, increasing adoption of cloud and collaborative tooling.

Service Desk Analyst Lead | December 2015 - September 2017

- Led service desk operations and major-incident communications, coordinating real-time response with IT leadership.
- Built training resources and knowledge base documentation that streamlined support workflows and shortened ramp time for new analysts.

User Technology Support Coordinator | July 2013 - December 2015

- Served as module owner for the BMC Remedy upgrade, improving efficiency and transparency in incident and request management.
- Rebuilt the university software distribution portal with cross-functional partners, improving accessibility and license compliance.

Technology Facilitator

Winston-Salem/Forsyth County Schools, Winston-Salem, NC | January 2013 - June 2013

- Drove classroom technology integration and delivered faculty training on instructional technology tools.

TECHNICAL ENVIRONMENT

Endpoint Management: Jamf Pro, Microsoft Intune, SCCM, Apple Business Manager, Apple School Manager, Chrome Browser & Device Management, macOS, Windows, ChromeOS, iOS/iPadOS

Collaboration & Productivity: Google Workspace administration (Admin Console, OU structure, Drive and shared drive governance, Groups, Chrome policy), Microsoft 365 administration, Zoom administration

Automation & Scripting: Google Apps Script, Google AppSheet, shell scripting, Jamf policy and workflow automation, automated reporting and data exports

ITSM & Service Delivery: ServiceNow, Freshservice, Freshdesk, BMC Remedy, SLA and metrics reporting, knowledge management

Security & Compliance: Endpoint hardening and patch compliance, device encryption, CrashPlan, Cisco Secure Client

AI Tooling: Google Gemini / Google AI Pro, Microsoft Copilot, enterprise generative AI evaluation and rollout

EDUCATION

Bachelor of Science, Business Administration - Management Information Systems

East Carolina University, College of Business, Greenville, NC
